Introduction

This Policy for Certified Professional Certificates complements the provisions established in the Certification Practices Statement and specifically expresses the set of rules defined by the Andes SCD Certification Authority for the application of Certified Professional certificates to a community, the uses that can be given to this type of certificate and the technical requirements, legal and security requirements for their issuance and revocation.

It is recommended to read this document before applying for a Certified Professional Certificate or making use of it for verification of electronic signatures in order to know the scope of application and the legal effects associated with the use of this type of certificate

1. Presentation of the document

1.1. Document Name and Identification

Document	CERTIFIED PROFESSIONAL CERTIFICATION POLICY
Description	The Certified Professional certificate certifies the subscriber's identity and professional title, and allows the subscriber to digitally sign documents in their own name and interest
OID Identifier	1.3.6.1.4.1.31304.1.2.3.13
Version	V 13
Date of issue	January 30, 2026
Location	https://www.andesscd.com.co/docs/pc_profesionaltitulado.pdf

1.2. References

The development of the content of the Certification Policies and the Statement of Certification Practices is issued taking into account the recommendations of RFC **3647**: Internet X.509 Public Key Infrastructure: Certificate Policy and Certification Practices Framework and the following European standards:

- ETSI EN 319 411-2: Policy Requirements for certification authorities issuing qualified certificates.
- ETSI EN 319 411-1: Policy Requirements for certification authorities issuing public key certificates.

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13

1.3. Policy management

The content of this Certification Policy is managed by the Policy and Safety Committee in charge of its preparation, registration, maintenance and updating. Below are the details of the policy and safety committee and a contact person available to answer questions regarding this document.

1.3.1. Organization that manages the document

Name : Policy & Safety Committee
Address : Calle 26 #69c-03 Torre B oficina 701.
Email : comite.politicas.seguridad@andesscd.com.co
Phone : PBX (601) 2415539

1.3.2. Contact Person

Company name : Andes Servicio de Certificación Digital S.A ACRONYM ANDES SCD SA.
Name : Sandra Cecilia Restrepo Martinez – General Manager
Address : Calle 26 #69c-03 Torre B oficina 701.
Email : info@andesscd.com.co
Phone : PBX (601) 2415539

1.3.3. Policy Approval Procedures

The Certified Professional Certification Policy is administered by the Policy and Safety Committee and is approved by the General Management of ANDES SCD, following the documented information procedure.

1.3.4. Publication of the document

The Certified Professional Certification Policies and the Statement of Certification Practices are documents for public use that are available on the Andes SCD website. Any modifications to these documents are published immediately maintaining a version history.

1.4. User community and applicability

The Certified Professional certificates are issued to natural persons, they accredit the identity of the holder and his/her faculty as a qualified professional in the signing of electronic documents, guaranteeing the authenticity of the sender of the communication, the non-repudiation of the origin and the integrity of the content. The holder of a certified professional certificate acts in his or her own name and interest.

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13

Certificate Authority (CA)

The Andes SCD Certification Authority is the entity that acts as a trusted third party between the subscriber and the users in the electronic medium and is responsible for issuing and managing the digital certificates for Certified Professionals in accordance with this Certification Policy. The Statement of Certification Practices details the hierarchy of the Certification Authorities that make up Andes SCD

Registration Authority (RA)

The Registration Authorities are the entities delegated by the Andes SCD Certification Authority to manage issuance requests, corroborate the identity of applicants and carry out a complete registration of applicants who wish to acquire a digital certificate in accordance with this Certification Policy.

Subscribers

The subscriber is the natural person who has acquired a Certified Professional certificate issued by the Andes SCD Certification Authority and is considered a subscriber while said certificate is valid.

Applicants

The applicant is the natural person who wishes to access digital certification services by acquiring a Certified Professional certificate issued by Andes SCD. Under no circumstances are applications accepted for this type of certificate in the name of people who do not present their professional card.

Users

The user is any person who voluntarily places their trust in the Certified Professional certificates issued by the Andes SCD Certification Authority and who uses the certification service as a means to accredit the authenticity and integrity of a document signed by a third party.

1.5. Scope of application

1.5.1. Applications of the certificate

The Certified Professional certificate issued under this policy may be used for the following purposes:

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13
		Effective Date:	17/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

Identity authentication

The certificate can be used to identify a natural person as a Qualified Professional in the field of their activity.

Digital signature

Digital signatures made with Certified Professional certificates offer the means of support by guaranteeing the authenticity of the origin, the integrity of the signed data and the non-repudiation.

- **Authenticity of origin:** In an electronic communication, the subscriber may validly prove his or her identity to another person by demonstrating possession of the private key associated with the respective public key contained in the certificate
- **Integrity of the document:** There is a guarantee that the document was not altered or modified after being signed by the subscriber since the summary of the document is encrypted with the private key of the issuer who is the only one in possession of it.
- **Non-repudiation:** It prevents the issuer of the signed document from denying at a certain time the authorship or integrity of the document, since the signature through the digital certificate can prove the identity of the issuer without the issuer being able to repudiate it.

Information encryption

It is the process of transforming information to make it incomprehensible to everyone except the recipient to whom it is addressed

1.5.2. Certificate usage limits

Certified Professional certificates may not be used to act as either a Registration Authority or a Certificate Authority, by signing other public key certificates of any kind or revoked certificate lists (CRLs). Nor may they be used for purposes contrary to current legislation.

1.5.2.1. Certificate usage limit on operating systems

For the use of the certificate, please note the following forms of delivery:

- **Virtual Token:**

For the use of the virtual token it is essential to have the Windows 10 operating system and higher in 64 and 32-bit versions; for the MacOS operating system it is

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13
		Effective Date:	17/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

required to use the online signature service provided by Andes SCD through our website.

- **Physical Token:**

For the use of the physical token, it is essential to have the Windows seven service pack 2 operating system onwards; for MacOS operating system, you must have the Monterrey version 12.0.1 and onwards, as well as an Intel processor, to guarantee its operation.

- **Centralised:**

The delivery of certificates under the centralized signature model is conditional on the development for the integration of the web services exposed by ANDES SCD, to allow signing operations making use of the certificates escrowed in its PKI infrastructure.

1.5.3. Prohibitions on the use of certificates

The performance of unauthorized operations according to this Certification Policy, by third parties or subscribers of the service will exempt the Andes SCD Certification Authority from any liability for this prohibited use.

- The use of the Certified Professional certificate to sign other certificates or revocation lists (CRLs) is not permitted
- It is prohibited to use the certificate for uses other than those stipulated in the "Permitted Uses of the Certificate" and "Limits on Use of Certificates" section of this Certification Policy.
- Alterations to certificates are not allowed and the certificate must be used as provided by the Andes SCD Certificate Authority.
- The use of certificates in control systems or systems intolerant to failures that may cause personal or environmental damage is prohibited.
- Any action that violates the provisions, obligations and requirements stipulated in this Certification Policy is considered prohibited.
- It is not possible for Andes SCD to issue any assessment on the content of the documents signed by the subscriber, therefore, the responsibility for the content of the message is the sole responsibility of the signatory.
- It is not possible for Andes SCD to recover the encrypted data in case of loss of the subscriber's private key because the CA for security does not

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13

		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

keep a copy of the subscribers' private key, therefore, it is the subscriber's responsibility to use data encryption.

1.5.4. Minutes and contracts

By registering the request for the issuance of certificates, the subscriber declares that he/she is aware of and accepts the [terms and conditions of provision of](#) the service described on the website.

No explicit confirmation by the subscriber is required to accept the terms and conditions of the service. The terms and conditions of service provision are considered to be accepted at the time the request is registered.

Once the digital signature certificate has been issued, ANDES SCD will deliver a notification by email to the subscriber with the information of interest to manage the life cycle of their certificate. Such notification contains at least the following information:

- a) Type of certificate
- b) PC OID Reference
- c) Certificate serial
- d) Effective start
- e) End of validity
- f) Certificate holder
- g) Entity
- h) Certificate delivery form
- i) Revocation Code
- j) PIN

2. Certificate Publication and Registration

All system data relating to the life cycle of certificates are kept digitally for the period established by current legislation where applicable. Current and expired certificates are retained published in LDAP in accordance with RFC 4523.

3. Identification and authentication

The procedures and criteria applied to verify the identity of the applicant and approve the issuance of a Certified Professional certificate are described below.

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13
		Effective Date:	17/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

3.1. Names

3.1.1. Types of names

The Certified Professional Certificates have a section called Subject whose objective is to identify the holder or subscriber of the certificate, this section contains a DN or distinguished name characterized by a set of attributes that make up an unequivocal and unique name for each subscriber of the certificates issued by Andes SCD.

Abbreviate	Name	Description
CN	<u>Name</u>	Full names and surnames of the subscriber
S	<u>Serial</u>	Subscriber identification number
E	<u>Email</u>	Subscriber Email
C	<u>Country</u>	Abbreviation of the country where the subscriber resides
ST	<u>Department</u>	Name of the department where the subscriber resides
L	<u>City</u>	Name of the municipality where the subscriber resides
STREET	<u>Address</u>	Address where the subscriber resides
T	<u>Title</u>	University career name + professional card
Or	<u>Organization</u>	Association of professionals of the country that issued a professional card
OU	<u>Unity Organizational</u>	Name of the university from which you are a graduate
OU	<u>Unity Organizational</u>	Qualified Professional Issued by Andes SCD Calle 26 #69c-03 Torre B oficina 701.

3.1.2. Need for names to be meaningful

All Certified Professional certificates issued by Andes SCD have as their main characteristic the full identification of the subscriber and the assignment of a significant name to their certificate.

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13
		Effective Date:	17/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

3.1.3. Anonymous and pseudonyms in names

This Certificate Policy does not allow anonymous or pseudonyms to identify the name of a Natural Person or the name of the university or professional association that issued the professional card.

In the case of a natural person with Colombian nationality, the name must be made up of names and surnames as it appears on the citizenship card. If the natural person is a foreigner, the name must be made up of names and surnames, as it appears in the passport or equivalent document.

3.1.4. Rules for interpreting name formats

The rules for interpreting name formats follow the X.500 reference standard in ISO/IEC 9594.

3.1.5. Uniqueness of the names

The distinguished names of the Certified Professional certificates are guaranteed to be unique for each subscriber because they contain serial and email attributes that allow distinguishing between 2 identities when there are problems of duplication of names.

3.2. Identity Approval

3.2.1. Method to prove possession of the private key

The Andes SCD Statement of Certification Practices details the procedure used by the Certifying Authority to demonstrate that the applicant has the private key corresponding to the public key that is intended to be linked to the Certified Professional certificate.

3.2.2. Authenticating the Applicant's Identity

The applicant can process their application for the issuance of a Qualified Professional certificate in the following ways:

1. **Face-to-face:** The applicant makes the application in person at the Andes SCD facilities
2. **Remote:** The applicant makes the request from the Andes SCD website.

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13
		Effective Date:	17/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

3. **Conventions:** Applications for the issuance of certificates by agreements are processed in accordance with the internal procedures defined by the registration authority.

In all applications for a digital signature certificate, the ECD will carry out identity validation using the mechanisms available for this purpose.

The documentary requirements are described below:

Requirement	Face-to-face application	Remote application or agreements
Citizenship card or document proving identity (Legible)	Submit original and photocopy Document	Digital PDF document required
Professional Card (readable)	Submit original and photocopy Document	Digital PDF document required

The documentation indicated in the table above will be used as additional support. However, our external sources that ensure and validate the veracity of the information will be our main reference and the basis for decision-making in the process of studying and issuing the certificate. In the event that any novelty or inconsistency is detected in the information from these sources, the registration authority may request additional documentation from the user to support and argue the condition to be validated.

Face-to-face requests will be registered through the Andes SCD website by the Customer Service area.

In the case of applications processed by agreement, other documents or digital evidence may be accepted to verify their relationship with the institution.

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13
		Effective Date:	17/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

In addition, the applicant must provide the following information that will allow Andes SCD to contact him or her when necessary:

Requirement	Additional information
1	Country, department and city where you live
2	Address and number, landline and cell phone
3	Personal Email

The information provided in the application for the issuance of the Certified Professional certificate is studied by the RA Agent who is responsible for verifying that the information is original, sufficient and adequate in accordance with the internal procedures defined by Andes SCD.

In the event that the applicant claims the modification of the personal data with respect to those contained in the identification document presented, he or she must show the corresponding civil registry certificate where the variation appears.

3.2.3. Unverified information about the applicant

The registration authority verifies all the applicant's information that is supported by documents or digital evidence as support. Residence address and email are not verified, presuming the good faith of the information provided by the applicant.

3.2.4. Response Times

The ANDES SCD RA processes applications one to two business days after the application is registered along with complete documentation and information and a successful result in identity validation.

In the event of inconsistencies with the documentation provided or identity validation, the RA agents will send an email with a link for the applicant to update the required information or documentation, if after 3 business days from the sending of the notification the update has not been generated and given the impossibility of

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13

contacting the applicant, The application may be rejected and the applicant must register a new application attaching the corresponding documentation.

When the delivery format is a physical token, the delivery time of the digital certificate after its issuance will depend on the place of destination, for more information, you can consult our certificate delivery policy on our website.

3.2.5. Identification and authentication to request revocation

The following persons may apply for the revocation of a certificate:

- To the subscriber himself, in which case he must use the revocation code that was given to him at the time of acquiring the certificate.
- The authorized operators of Andes SCD or the certification hierarchy may revoke any certificate in those cases in which the circumstances established in the certificate revocation section of the Statement of Certification Practices are incurred.

4. Certificate lifecycle and operating procedures

The Certified Professional certificates issued by Andes SCD have an explicit period of validity in the attributes "valid from" and "valid until" of the certificate itself. The validity of the certificate may not exceed 730 calendar days.

At the end of the period of validity, the certificate becomes invalid and permanently ceases its operation and the provision of the certification service between Andes SCD and the subscriber is terminated.

4.1. Request for certificates

The Andes SCD Certification Authority ensures that the subscribers have been fully identified and that the certificate request is complete.

4.1.1. Who can request the issuance of a certificate

The request for a digital certificate can be made by any person of legal age who presents their professional card and who is fully capable of assuming the obligations and responsibilities inherent to the possession and use of the certificate.

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13
		Effective Date:	17/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

4.1.2. Procedure for requesting a certificate

The procedure that the applicant must carry out to acquire a digital certificate is described in the DPC Certification Practice Statement. See section "Procedure for requesting the issuance of a certificate" in the DPC.

4.1.3. Certificate acceptance

The procedure for acceptance of the certificate is described in the DPC Certification Practice Statement, see section "acceptance of the certificate" in the DPC.

4.1.4. Publication of the certificate by Andes SCD

Once the certificate has been issued by Andes SCD, it is published in the certificate directory.

4.1.5. Pair of keys and use of the certificate

4.1.5.1. On the part of the subscriber

The subscriber has a public key and a private key that are legally valid during the period of validity of the Certified Professional certificate that legitimizes them. The private key is for the exclusive use of the subscriber for the purposes stipulated in this Certification Policy and must be protected to prevent unauthorized use by third parties.

The Subscriber may only use the certificate and key pair after accepting the terms of use set forth in the DPC and this CP and only for what they establish. Once the certificate has expired or is revoked, the subscriber is obliged not to use the private key again.

The Subscriber may only use the Private Key and Certificate for authorized uses on the PC and in accordance with the 'Key Usage' and 'Extended Key Usage' fields of the certificate.

The key pair associated with the end-entity certificates issued by Andes SCD have the following uses enabled:

- Digital Signature
- No repudiation

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13
		Effective Date:	17/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

- Information encryption

The key pair associated with the certificates of the subordinate CAs of Andes SCD has the following uses enabled:

- Digital signature
- Signing certificates
- CRL Company

4.1.5.2. From trusted users

Users who rely on the Andes SCD certification service must verify the uses established in the 'Key usage' field of the certificate or in this Certification Policy to know the scope of application of the Certified Professional certificate.

Users who rely on the Andes SCD certification service must take responsibility for verifying the status of the certificate before placing their trust.

4.2. Certificate renewal – Pair of keys.

Andes SCD does not contemplate the certificate renewal process, if the subscriber wishes to obtain a new certificate he must request the issuance of the certificate when his original certificate has expired.

4.2.1. Certificate Key Renewal

The subscriber may renew the certificate with a new pair of keys, by requesting the issuance of the certificate when it has expired or has been revoked.

4.3. Modifying certificates

Digital certificates issued by Andes SCD cannot be modified. Any modification to the content of the certificates implies the revocation and issuance of a new certificate, which will be subject to the application and verification process, complying with the requirements established in this certification policy.

4.4. Suspension of certificates

Digital certificates issued by ANDES SCD cannot be suspended. Any suspension of the status of the certificate implies the revocation and issuance of a new certificate, which

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13
		Effective Date:	17/02/2026

		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

will be subject to the application and verification process, complying with the requirements established in this certification policy.

4.5. Decline of the application

As stipulated in the Andes SCD Statement of Certification Practices in the declination section of the application.

4.6. Revocation of certificates

The revocation consists of the loss of reliability of the certificate and the permanent cessation of its operation, preventing its use by the subscriber; once the certificate has been revoked, the Certificate Authority includes it in the CRL in order to notify third parties that a certificate has been revoked at the time its verification is requested.

ANDES SCD publishes the CRL every 24 hours, the last CRL issued for each CA contains all the certificates issued by the respective CA that are revoked as of the date of generation of the CRL. The user is advised to check the date of the CRL to verify that it is the one recently issued.

The certificates that are revoked may not for any circumstance return to the active state, this being a definitive action.

The subscriber who holds the certificate may request the revocation of a Certified Professional certificate from the means of revocation offered by Andes SCD in the section "means to revoke certificates" of the DPC and following the revocation procedure specified in the section "procedure to revoke certificates" of the DPC. Additionally, Andes SCD or any of its constituent authorities may request the revocation of a Certified Professional certificate if it has knowledge or suspicion of the compromise of the subscriber's private key or any other determining fact that requires the revocation of the certificate.

The Statement of Certification Practices details the circumstances under which the revocation of a digital certificate is resorted to, the means available to carry out the revocation, the procedure for revoking a certificate, the time it takes Andes SCD to process the revocation request and to publish the revoked certificates in the CRL.

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13
		Effective Date:	17/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

Issued CRLs, including those that have been replaced by newer versions or that have expired, are stored and retained for a minimum period of seven (7) years from the date of issuance

4.7. Replacement of certificates

The replacement of a certificate is the procedure where a digital signature certificate is replaced at the request of the entity/subscriber that has acquired it for any of the following reasons:

- Loss of Token Device
- Loss or exposure of certificate PIN
- Change of certificate holder information, except for the identification number.

Andes SCD has established the following conditions for the replacement of a certificate:

- To make the replacement request, the certificate to be replaced must be valid.
- The certificate to be replaced must have an initial validity equal to or greater than 6 months
- The certificate to be replaced must have a remaining validity of more than 60 days.
- Not having previously replaced the certificate
- Communicate the reason for the cancellation of the certificate to be replaced
- The replacement applies to request the same type of certificate initially acquired

The conditions of replacement may vary according to the specific agreements with users managed through a coordinator or through agreements.

4.8. Certificate Status Services

The Statement of Certification Practices provides information on the means of publishing the status of certificates issued, the availability of the service, and the end of subscription to the certification service.

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13
		Effective Date:	17/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

4.9. Validity of certificates

The validity period of the digital certificates issued by ANDES SCD S.A. is explicitly defined in each certificate through the validity fields notBefore and notAfter, which are generated and coded in accordance with the ISO 9594 / X.509 and ISO 15782-1 standards.

For all types of certificates issued by ANDES SCD S.A., the maximum validity shall not exceed seven hundred and thirty (730) calendar days, counted from the date of issuance of the certificate.

The pair of keys has the same period of validity as the digital certificate that endorses them

5. Security Controls

The systems and equipment used by ANDES SCD to offer the certification service are physically located in a Data Center

Designed to specifications with the strictest construction regulations and following rigorous operating standards to ensure that the equipment and information housed there have the highest level of security and availability. In the event of an incident with its main Data Center, ANDES SCD has an alternate data center that has optimal security mechanisms to guarantee continuity in the provision of services.

The technological infrastructure that supports the certification services that are continuously monitored through a NOC/SOC to identify any type of alert or incident that may compromise the security or availability of the provision of services. The other procedural, physical security and personal security controls are specified in the Andes SCD Certification Practices Statement.

6. Technical security controls

6.1. Key generation and installation

6.1.1. Key pair generation

The public and private keys of Certified Professional Certificate holders are generated in accordance with the processes stipulated in the DPC in the section

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13
		Effective Date:	17/02/2026

		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

"generation of the pair of keys". The method of generating the subscriber's key pair varies according to the form of delivery of the certificate chosen by the subscriber.

6.1.2. Delivery of the private key to the subscriber

When the private keys of the Certified Professional certificates are generated by ANDES SCD, they may only be stored on cryptographic devices that comply with the FIPS 140-2 Level 3 standard.

When the delivery format is PKCS10 the key pair is generated by the subscriber himself, the private key is at no time known by ANDES SCD

The mechanism for handing over the private key to the Certified Professional Certificate subscriber is described in the DPC

6.1.3. Delivery of the public key to the certificate issuer

The mechanism for handing over the public key to holders of Certified Professional Certificates is described in the DPC in the section "handing over the public key to the issuer of the certificate".

6.1.4. Subscriber Public Key Distribution

The public key of any subscriber of Certified Professional Certificates is permanently available for download in the Andes SCD certificate directory as long as the certificate is not revoked.

6.1.5. Distribution of the Andes SCD public key to users

The public key of the Andes root CA and the Class II or end-entity certificate-issuing CA is permanently available for download on the Andes SCD website.

When the SubCA public key is renewed, the Certificate Authority makes the prior notification to the interested parties in accordance with the provisions of this DPC and the communications matrix.

This notification is made through the defined institutional channels, sufficiently in advance to allow the updating of the certification chains, dependent certificates and associated configurations, guaranteeing the continuity of the CA's services and avoiding operational interruptions.

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13
		Effective Date:	17/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

6.1.6. Private Key Usage Period

The period of use of the private key is the same time as the validity of the Certified Professional certificate or less if the certificate is revoked before expiring.

The Andes SCD DPC details the period of use of the private key of the root CA and the subordinate CAs issuing end-entity certificates

6.1.7. Size of the keys

The minimum size of Certified Professional certificate keys is 2048 bits based on the RSA algorithm.

The size of the certified keys of the CA issuing the Certified Professional certificates is 4096 bits long based on the RSA algorithm.

6.2. Private Key Protection Controls

The Andes SCD Statement of Certification Practices specifies the controls and standards of the cryptographic modules, the control, backup, storage, activation, deactivation and destruction of the Certification Authority's private keys.

The following specifies the controls for protecting the subscriber's private key.

 andes Servicio de Certificación Digital	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13
		Effective Date:	17/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

Protection Control	Subscriber-generated private key from Device TOKEN and CSR
<u>Private Key Backup</u>	Andes SCD does not perform backup, nor is any recovery mechanism implemented on the private keys of the subscribers generated from the TOKEN device or when the certificate is generated from CSR. Andes SCD is never in possession of such keys and they only remain in the custody of the subscriber himself
<u>Private Key Storage</u>	Subscribers' private keys generated from the TOKEN device are NEVER stored by Andes SCD. The same happens when the certificate is generated from CSR delivered by the subscriber. The private key must be stored by the subscriber himself through the retention of the TOKEN device or other methods, because they may be necessary to decrypt the historical information encrypted with the public key
<u>Private Key Transfer</u>	The subscribers' private key generated from the TOKEN never leaves the device. With the TOKEN device, the pair of keys is generated and its use is protected through a PIN that only the subscriber knows. The user-generated private key that CSR delivers for certificate generation is held by the subscriber and is never sent to Andes SCD.
<u>Private Key Activation</u>	The activation of the TOKEN device containing the subscriber's private key is done through a PIN that must be customized by the subscriber himself at the time of generating the pair of keys. The protection of activation data is the responsibility of the subscriber
<u>Deactivating the private key</u>	The method to disable the subscriber's private key is to remove the TOKEN device from the computer, immediately any associated content is disabled including the private key

 andes Servicio de Certificación Digital	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13
		Effective Date:	17/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

<u>Private Key Destruction</u>	The destruction of the private key can be performed by the subscriber himself using the functions provided by the TOKEN device, taking care not to affect other private keys stored on the device. The destruction of the subscriber's private key can be performed by the subscriber himself by deleting the private key corresponding to the CSR sent to Andes SCD. Private keys of subscribers to the centralized signing service are generated and stored in a protected form within an HSM, using key wrapping mechanisms with a non-exportable AES key. The Certificate Authority does not access or process keys in clear text, and their use is strictly controlled through authentication, authorization, and validation of the certificate status. When a certificate expires or is revoked, the associated private key is permanently disabled for use, preventing any further cryptographic operations, even if the protected material remains stored. This scheme guarantees the impossibility of use and non-reuse of private keys, in compliance with WebTrust criteria.
---------------------------------------	---

6.3. Supported Cryptographic Devices

Cryptographic devices supported by ANDES SCD must meet the following characteristics:

- Generates RSA key pairs up to 2048 bits.
- Algorithms for RSA, DES, 3DES, MD5 and SHA-256 generation implemented by hardware.
- Random number generator hardware.
- Digital signature generator hardware.
- Minimum available space of 64 Kb.
- FIPS 140-2 Level 3 Certification
- CE and FCC certified.
- Full support for PKI applications.

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13
		Effective Date:	17/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

- Compatible with CAPI and PKCS#11 interfaces.
- Support for multi-key storage.
- Support for X.509 V3 standard certificate format.

6.3.1. Associated risks

Cryptographic devices supported by ANDES SCD may present risks such as:

- Loss of the device
- Key Compromise
- Damage from improper handling or environmental conditions.
- Damage from voltage variations.

To mitigate the associated risks, some safety regulations must be taken into account:

- The PIN is confidential, personal and non-transferable.
- It is recommended to change the PIN periodically.
- Cryptographic devices should be kept in proper environmental conditions away from moisture.
- In case of compromise or loss of the private key, the revocation of the certificate must be requested.

6.4. Other aspects of key pair management

6.4.1. Public Key File

Andes SCD keeps all Certified Professional digital certificates on file, which include the public key for the period stipulated in the "public key file" section of the DPC.

6.4.2. Certificate Operational Periods and Key Pair Usage Periods

The life span of the Certified Professional certificate is governed by its validity or as long as its revocation is not explicitly stated in a CRL or in the online verification system. If any of these events occur, the validity of the certificate is terminated and the certificate can only be used for historical verification purposes.

The pair of keys is valid as long as there is a valid Certified Professional certificate to support them. Once the certificate is no longer valid, the keys lose all legal validity and their use is limited to exclusively personal purposes.

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13
		Effective Date:	17/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

6.5. Activation Data

6.5.1. Activation and installation data generation

The subscriber must generate the activation data of their TOKEN by changing the initial PIN that the device comes with by default.

The PIN must be kept by the subscriber so that it is not known to anyone else and exclusive control of the TOKEN is guaranteed.

6.5.2. Activation Data Protection

The PIN or activation data of the TOKEN must be personalized by the applicant before generating their pair of keys or if there is a suspicion that a third party knows this data.

To change the PIN, it is necessary to download the software application offered by the manufacturer of the TOKEN and which is available on the Andes SCD website

6.6. Computer Security Controls

The Statement of Certification Practices describes Andes SCD's controls to ensure adequate safeguarding of IT resources.

6.7. Cessation of ECD activities

The Statement of Certification Practices describes the procedures for notification and termination of the CA or RA

7. Certificate, CRL, and OCSP profiles

7.2. Certificate Profiles

7.2.1. Version number

Certified Professional certificates issued under this policy are in compliance with the X.509 V3 standard and in compliance with RFC 5280 for certificate and CRL profiles.

7.2.2. Certificate Extensions

The Certified Professional certificates issued by Andes SCD use a series of extensions that are intended to establish the uses of the certificate, reference the applicable Certification Policies and additional restrictions. Below are the extensions included in the digital certificates of Qualified Professional

Extensions Certified Professional Certified according to X.509V3 standard	
Name	Value
Access to issuer information	Access Method=Online Certificate Status Protocol Dirección URL=http://ocsp.andesscd.com.co
Holder key identifier	Holder's key identifier
Issuer Key Identifier	Identifier of the Andes SCD CA Key That Issued the Certificate
CRL Distribution Points	CRL publication URL of the CA that issued the certificate.
Using the Key	Digital Signature

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13

[1,2]Policy certifier information: Policy certifier ID=CPS Certifier: Current DPC URL

7.2.3. Algorithm object identifiers

Certified Professional digital certificates issued under this policy use the following algorithms and their corresponding identifiers (OIDs)

- SHA256withRSAEncryption Signature Algorithm OID 1.2.840.113549.1.1.11
- RSAEncryption Public Key Algorithm OID 1.2.840.113549.1.1.1

7.2.4. Name formats

Certified Professional Digital Certificates issued by Andes SCD are restricted to X.500 'Distinguished names' (DN) which are unique and unambiguous, the certificates contain the DN of the issuer and subscriber of the certificate in the issuer name and subject name fields respectively.

7.2.5. Name restrictions

Digital certificates issued under this policy have DN's in accordance with X.500 recommendations that are unique and unambiguous.

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13

7.2.6. Certification Policy Identifier Object

Certification policies and practices are identified by a unique number called OID, the OID assigned to this policy is 1.3.6.1.4.1.31304.1.2.3.13

More information on this topic can be found in the Statement of Certification Practices in the Identifier Object section of the certification policy.

7.2.7. Syntax and semantics of policy qualifiers

The extension of the certificates referring to the ratifiers of the Certification Policy contains the following information:

- **Policy identifier:** Contains the identifier of the Certified Professional Certificate Policy
- **CPS:** Indicates the URL where the Statement of Certification Practices (CPD) is published to be consulted by users
- **User Notice:** contains the text "The use of this certificate is subject to the CP of a DPC qualified professional established by Andes SCD". Accreditation code: 16-ECD-004

7.3. CRL Profile

7.3.1. Version Number

The CRLs issued by Andes SCD correspond to the X.509 version 2 standard

7.3.2. CRLs and extensions

The CRL revocation list is issued as stipulated in RFC 5280

CRL profile according to X.509V2 standard – CRL		
Name	Description	Value
Version	CRL version	V2
CRL Number	CRL Unique Number	Identified from the CRL
Issuer	Data from the end-entity subordinate CA that issued the CRL	View the CRL for CA data issued by the CRL
Signature algorithm	Algorithm used for CRL signature	SHA256withRSA

Issue distribution points	URL where the CRLs issued by Andes SCD are published	View the CRL for the publication URL
Revoked certificates	List of revoked certificates specifying the serial number, date of revocation and reason for revocation	

7.4. OCSP Profile

OCSP Service and Response Certificate Profile

The Certificate Authority (CA) operates an Online Certificate Status Protocol (OCSP) service, in accordance with the provisions of RFC 6960, in order to provide timely and reliable information on the status of issued digital certificates.

The OCSP service is used by trusted third parties, applications, and systems that require verification of the revocation status of certificates issued by the CA.

OCSP responses are digitally signed by the CA or by an authorized OCSP Responder, using an OCSP response certificate whose profile, extensions, and restrictions are defined in this paragraph.

The consumption of the OCSP service is done through the access points published by the CA, using OCSP requests that conform to the applicable standards. The service responds, at a minimum, with the states good, revoked, or unknown, according to the information available in the CA revocation repositories.

	QUALIFIED PROFESSIONAL CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.3.13
		Effective Date:	17/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

OCSP responses include the `thisUpdate` and `nextUpdate` temporal fields, which determine the validity period of the response and allow trusted third parties to evaluate its validity.

The CA implements technical and operational controls to guarantee the availability, integrity and authenticity of the OCSP service, as well as mechanisms for monitoring and recording events associated with its operation.

Note: The following example is illustrative and does not limit the use of other OCSP-compliant tools.

```
openssl ocsp -issuer ca_emisora.pem -cert certificado_consultar.pem -url
http://ocsp.andesscd.com.co -CAfile ca_emisora.pem -resp_text -noverify
```

Example overview:

- issuer: Certificate of the CA issuing the certificate queried.
- cert: Certificate whose status is to be verified.
- url: Access point of the OCSP service published by the CA.
- CAfile: CA certificate for response validation (if applicable).
- resp_text: Displays the readable contents of the OCSP response.

The OCSP response will allow you to determine the status of the certificate consulted (good, revoked or unknown) and evaluate the validity of the information using the temporary fields included in the response.

7.4.1. Version number

The OCSP certificate is issued in accordance with the X.509 V3 standard

7.4.2. OCSP Extensions

OCSP extensions according to X.509V3 standard	
Name	Value
Basic Constraints, critical	CA false

9.5.1. Rights and duties of ANDES SCD

The Statement of Certification Practices lists the rights and duties of the Andes SCD Certification Authority

9.5.2. Rights and duties of the applicant

The Statement of Certification Practices lists the rights and duties of applicants.

9.5.3. Rights and duties of the subscriber

The Statement of Certification Practices lists the rights and duties of subscribers.

9.5.4. Prohibitions for the subscriber:

The subscriber, in the consumption of ANDES certification services, must refrain from:

1. Alter or modify, in whole or in part, the digital certificate or the software delivered by ANDES SCD, or allow third parties to do so.
2. Copy or reproduce in any form the digital certificate, or allow its copying or reproduction.
3. Perform reverse engineering, decoding, disassembly or perform any type of action aimed at knowing or deciphering the source code, object code or other relevant information regarding the digital certificate or software that is related to the provision of the ANDES SCD service.
4. Transfer, assign or negotiate the rights granted under the services of ANDES.
5. Allow third parties to benefit from or use, directly or indirectly, the rights that derive from the provision of digital certification services, under the conditions of this document.
6. Give the digital certificate a use other than that which is derived from the Statement of Certification Practices.
