Introduction

This Policy for Legal Entity Certificates complements the provisions established in the Statement of Certification Practices and specifically expresses the set of rules defined by the Andes SCD Certification Authority for the application of Legal Entity certificates to a community, the uses that can be given to this type of certificate and the technical requirements. legal and security requirements for their issuance and revocation.

It is recommended to read this document before applying for a Legal Entity Certificate or making use of it for electronic signature verification in order to know the scope of application and the legal effects associated with the use of this type of certificate

1. Presentation of the document

1.1. Document Name and Identification

Document	LEGAL ENTITY CERTIFICATION POLICY
Description	The Legal Entity certificate certifies the identity of the subscriber and its status as a company or legal entity, and allows the subscriber to digitally sign documents in the capacity that their certificate accredits.
OID Identifier	1.3.6.1.4.1.31304.1.2.9.13
Version	V 13
Date of issue	January 30, 2026

Phone : PBX (601) 2415539

1.3.3. Policy Approval Procedures

The Legal Entity Certification Policy is administered by the Policy and Security Committee and is approved by the ANDES SCD Management, following the documented information procedure.

1.3.4. Publication of the document

The Legal Entity Certification Policies and the Statement of Certification Practices are documents for public use that are available on the Andes SCD website. Any modifications to these documents are published immediately maintaining a version history

1.4. User community and applicability

Legal Entity certificates are issued to entities, they accredit the identity of the holder and their status as a Legal Person in the signing of electronic documents, guaranteeing the

	LEGAL ENTITY CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.9.13

		Reviewed:	Policy and Security Committee
		Approved:	General Manager

authenticity of the sender of the communication, the non-repudiation of the origin and the integrity of the content.

Certificate Authority (CA)

The Andes SCD Certification Authority is the entity that acts as a trusted third party between the subscriber and the users in the electronic medium and is responsible for issuing and managing the digital certificates for Legal Entities in accordance with this Certification Policy. The Statement of Certification Practices details the hierarchy of the Certification Authorities that make up Andes SCD

Registration Authority (RA)

The Registration Authorities are the entities delegated by the Andes SCD Certification Authority to manage issuance requests, corroborate the identity of applicants and carry out a complete registration of applicants who wish to acquire a digital certificate in accordance with this Certification Policy.

Subscribers

The subscriber is the entity that has acquired a Legal Entity certificate issued by the Andes SCD Certification Authority to act in the electronic environment on its own behalf. A subscriber is considered as long as said certificate is valid.

Applicants

The applicant is the natural person who wishes to access digital certification services by acquiring a Legal Entity certificate issued by Andes SCD.

Under no circumstances are applications for this type of certificate accepted from people who do not prove to be the legal representative of the legal person who will appear as the holder of the certificate.

Users

The user is any person who voluntarily places his trust in the Legal Entity certificates issued by the Andes SCD Certification Authority and who uses the certification service as a means to accredit the authenticity and integrity of a document signed by a third party.

	LEGAL ENTITY CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.9.13
		Effective Date:	16/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

1.5. Scope of application

1.5.1. Applications of the certificate

The Legal Entity certificate issued under this policy may be used for the following purposes:

Identity authentication

The certificate can be used to identify a legal person in the scope of its activity.

Digital signature

Digital signatures made with Legal Entity Certificates offer the means of support by guaranteeing the authenticity of the origin, the integrity of the signed data and the non-repudiation.

- **Authenticity of origin:** In an electronic communication, the subscriber may validly prove his or her identity to another person by demonstrating possession of the private key associated with the respective public key contained in the certificate
- **Integrity of the document:** There is a guarantee that the document was not altered or modified after being signed by the subscriber since the summary of the document is encrypted with the private key of the issuer who is the only one in possession of it.
- **Non-repudiation:** It prevents the issuer of the signed document from denying at a certain time the authorship or integrity of the document, since the signature through the digital certificate can prove the identity of the issuer without the issuer being able to repudiate it.

Key Encryption and Data Encryption

It is the process of transforming information to make it incomprehensible to everyone except the recipient to whom it is addressed

1.5.2. Certificate usage limits

Legal Entity certificates may not be used to act as either a Registration Authority or a Certificate Authority, signing other public key certificates of any kind or lists of revoked certificates (CRLs). Nor may they be used for purposes contrary to current legislation.

	LEGAL ENTITY CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.9.13
		Effective Date:	16/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

1.5.2.1. Certificate usage limit on operating systems

For the use of the certificate, please note the following forms of delivery:

- **PKCS#10:**

The delivery of certificates from a PKCS10 request, implies the generation of the pair of keys by the requestor, he sent a request attaching the CSR and its respective custody of the private key. This format applies to the issuance of certificates intended for use on unattended signing platforms, the limit of use of the certificates is defined in the respective certification policy.

1.5.3. Prohibitions on the use of certificates

The performance of unauthorized operations according to this Certification Policy, by third parties or subscribers of the service will exempt the Andes SCD Certification Authority from any liability for this prohibited use.

- The use of the Legal Entity certificate to sign other certificates or revocation lists (CRLs) is not allowed
- It is prohibited to use the certificate for uses other than those stipulated in the "Permitted Uses of the Certificate" and "Limits on Use of Certificates" section of this Certification Policy.
- Alterations to certificates are not allowed and the certificate must be used as provided by the Andes SCD Certificate Authority.
- The use of certificates in control systems or systems intolerant to failures that may cause personal or environmental damage is prohibited.
- Any action that violates the provisions, obligations and requirements stipulated in this Certification Policy is considered prohibited.
- It is not possible for Andes SCD to issue any assessment on the content of the documents signed by the subscriber, therefore, the responsibility for the content of the message is the sole responsibility of the signatory.
- It is not possible for Andes SCD to recover the encrypted data in case of loss of the subscriber's private key because the CA for security does not keep a copy of the subscribers' private key, therefore, it is the subscriber's responsibility to use data encryption.

1.5.4. Minutes and contracts

	LEGAL ENTITY CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.9.13
		Effective Date:	16/02/2026
		Version:	13
		Classification of information:	Public

		Approved:	General Manager

By registering the request for the issuance of certificates, the subscriber declares that he/she is aware of and accepts the [terms and conditions of provision of](#) the service described on the website.

No explicit confirmation by the subscriber is required to accept the terms and conditions of the service. The terms and conditions of service provision are considered to be accepted at the time the request is registered.

Once the digital signature certificate has been issued, ANDES SCD will deliver a notification by email to the subscriber with the information of interest to manage the life cycle of their certificate. Such notification contains at least the following information:

- a) Type of certificate
- b) PC OID Reference
- c) Certificate serial
- d) Effective start
- e) End of validity
- f) Certificate holder
- g) Entity
- h) Certificate delivery form
- i) Revocation Code
- j) PIN

2. Certificate Publication and Registration

All system data relating to the life cycle of certificates are kept digitally for the period established by current legislation where applicable. Current and expired certificates are retained published in LDAP in accordance with RFC 4523.

3. Identification and authentication

The procedures and criteria applied to verify the identity of the applicant and approve the issuance of a Legal Entity certificate are described below.

3.1. Names

3.1.1. Types of names

The Legal Entity certificates have a section called Subject whose objective is to identify the holder or subscriber of the certificate, this section contains a DN or

	LEGAL ENTITY CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.9.13

distinguished name characterized by a set of attributes that make up an unequivocal and unique name for each subscriber of the certificates issued by Andes SCD.

Abbreviate	Name	Description
CN	<u>Name</u>	Company name of the legal entity
S	<u>Serial</u>	Legal entity identification number + dv
And	<u>Email</u>	E-mail legal entity
C	<u>Country</u>	Abbreviation of the country of legal entity
ST	<u>Department</u>	Name of the legal entity department
L	<u>City</u>	Name of the municipality of the legal entity
STREET	<u>Address</u>	Legal entity address
T	<u>Title</u>	PJ – Area or dependency of the legal entity that makes use of the certificate
OU	<u>Unity</u> <u>Organizational</u>	Issued by Andes SCD Calle 26 #69c-03 Torre B oficina 701.

3.1.2. Need for names to be meaningful

All Legal Entity certificates issued by Andes SCD have as their main characteristic the full identification of the subscriber and the assignment of a significant name to their certificate.

3.1.3. Anonymous and pseudonyms in names

This Certificate Policy does not allow anonymization or pseudonyms to identify the name of a Legal Entity.

The name of the legal entity must be the corporate name that appears in the RUT, legal personality or equivalent document, acronyms or abbreviated names are not accepted.

3.1.4. Rules for interpreting name formats

The rules for interpreting name formats follow the X.500 reference standard in ISO/IEC 9594.

	LEGAL ENTITY CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.9.13
		Effective Date:	16/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

3.1.5. Uniqueness of the names

It is guaranteed that the distinguished names of the Legal Entity certificates are unique for each subscriber because they contain serial and email attributes that allow distinguishing between 2 identities when there are problems of duplication of names.

3.2. Identity Approval

3.2.1. Method to prove possession of the private key

The Andes SCD Statement of Certification Practices details the procedure used by the Certifying Authority to demonstrate that the applicant has the private key corresponding to the public key that is intended to be linked to the Legal Entity certificate.

3.2.2. Authenticating the Applicant's Identity

The applicant can process their application for the issuance of a Legal Entity certificate in the following ways:

1. **In person:** The applicant makes the application in person at the Andes SCD facilities.

Remote: The applicant makes the request from the Andes SCD website.

In all applications for a digital signature certificate, the ECD will carry out identity validation using the mechanisms available for this purpose.

The documentary requirements are described below:

Requirement	Face-to-face application	Remote Request or Agreement
Citizenship card or document proving the identity of the legal representative (legible)	Submit original and photocopy of document	Digital PDF document required
Chamber of commerce or document that accredits legal representation of the entity.	Submit Photocopy of document	Digital PDF document required

	LEGAL ENTITY CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.9.13
		Effective Date:	16/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

The documentation indicated in the table above will be used as additional support. However, our external sources that ensure and validate the veracity of the information will be our main reference and the basis for decision-making in the process of studying and issuing the certificate. In the event that any novelty or inconsistency is detected in the information from these sources, the registration authority may request additional documentation from the user to support and argue the condition to be validated.

Face-to-face requests will be registered through the Andes SCD website by the Customer Service area.

In addition, the applicant must provide the following information that will allow Andes SCD to contact him or her when necessary

Requirement	Additional information
1	Country, department and city where you live
2	Address and number, landline and cell phone
3	Personal Email
4	Email of your position

The information provided in the application for the issuance of the Legal Entity certificate is studied by the RA agent who is responsible for verifying that the information is original, sufficient and adequate in accordance with the internal procedures defined by Andes SCD.

3.2.3. Unverified information about the applicant

The registration authority verifies all the applicant's information that is supported by documents or digital evidence as support. Residence address and email are not verified, presuming the good faith of the information provided by the applicant.

3.2.4. Response Times

The ANDES SCD RA processes applications one to two business days after the application is registered along with complete documentation and information and a successful result in identity validation.

	LEGAL ENTITY CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.9.13
		Effective Date:	16/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

In the event of inconsistencies with the documentation provided or identity validation, the RA agents will send an email with a link for the applicant to update the required information or documentation, if after 3 business days from the sending of the notification the update has not been generated and given the impossibility of contacting the applicant, The application may be rejected and the applicant must register a new application attaching the corresponding documentation.

When the delivery format is a physical token, the delivery time of the digital certificate after issuance depends on the place of destination. For more information, you can consult our certificate delivery policy on our website.

3.2.5. Identification and authentication to request revocation

The following persons may apply for the revocation of a certificate:

- The legal representative of the entity to which the Legal Entity certificate belongs, in which case they must provide the revocation code that was given to them at the time of acquiring the certificate
- To the authorized representative of the entity to which the subscriber is linked, in which case it must formally notify Andes SCD in writing of the reason for requesting the revocation of the certificate of Legal Representative issued to the subscriber.
- The authorized operators of Andes SCD or the certification hierarchy may revoke any certificate in those cases in which the circumstances established in the Statement of Certification Practices are incurred.

4. Certificate lifecycle and operating procedures

The Legal Entity certificates issued by Andes SCD have an explicit period of validity in the attributes "valid from" and "valid until" of the certificate itself. The validity of the certificate may not exceed 730 calendar days.

At the end of the period of validity, the certificate becomes invalid and permanently ceases its operation and the provision of the certification service between Andes SCD and the subscriber is terminated.

	LEGAL ENTITY CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.9.13

4.1. Request for certificates

The Andes SCD Certification Authority ensures that the subscribers have been fully identified and that the certificate request is complete.

4.1.1. Who can request the issuance of a certificate

The request for the issuance of a digital certificate can be made by any person of legal age who proves to be the legal representative of a Legal Entity and who is in full capacity to assume the obligations and responsibilities inherent to the possession and use of the certificate

4.1.2. Procedure for requesting a certificate

The procedure that the applicant must follow to acquire a digital certificate is described in the Statement of Certification Practices in the section "Procedure to request the issuance of a certificate".

4.1.3. Certificate acceptance

The procedure for acceptance of the certificate is described in the DPC Certification Practice Statement section "acceptance of the certificate".

4.1.4. Publication of the certificate by Andes SCD

Once the certificate has been issued by Andes SCD, it is published in the certificate directory.

4.1.5. Pair of keys and use of the certificate

4.1.5.1. By the subscriber

The subscriber has a public key and a private key that are legally valid during the period of validity of the Legal Entity certificate that legitimizes them. The private key is for the exclusive use of the subscriber for the purposes stipulated in this Certification Policy and must be protected to prevent unauthorized use by third parties.

The Subscriber may only use the certificate and key pair after accepting the terms of use set forth in the DPC and this CP and only for what they establish.

Once the certificate has expired or is revoked, the subscriber is obliged not to use the private key again.

	LEGAL ENTITY CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.9.13

		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

4.1.5.2. By Trusted Users

Users who rely on the Andes SCD certification service must verify the uses established in the 'Key usage' field of the certificate or in this Certification Policy to know the scope of application of the Legal Entity certificate.

Users who rely on the Andes SCD certification service must take responsibility for verifying the status of the certificate before placing their trust.

The key pair associated with the end-entity certificates issued by Andes SCD have the following uses enabled:

- Digital Signature
- No repudiation
- Information encryption

The key pair associated with the certificates of the subordinate CAs of Andes SCD has the following uses enabled:

- Digital signature
- Signing certificates
- CRL Company

4.2. Certificate Renewal-Key Pair

Andes SCD does not contemplate the certificate renewal process, if the subscriber wishes to obtain a new certificate he must request the issuance of the certificate when his original certificate has expired

4.2.1. Renewal of certificate keys

The subscriber may renew the certificate with a new pair of keys, by requesting the issuance of the certificate when it has expired or has been revoked.

4.3. Modification of certificates

Digital certificates issued by Andes SCD cannot be modified. Certificates issued by ANDES SCD cannot be modified. Any modification to the content of the certificates implies the revocation and issuance of a new certificate, which will be subject to the application and verification process, complying with the requirements established in this certification policy.

	LEGAL ENTITY CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.9.13
		Effective Date:	16/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

4.4 Suspension of certificates

Digital certificates issued by ANDES SCD cannot be suspended. Any suspension of the status of the certificate implies the revocation and issuance of a new certificate, which will be subject to the application and verification process, complying with the requirements established in this certification policy.

4.5. Decline of Application.

As stipulated in the Andes SCD Statement of Certification Practices in the declination section of the application.

4.6 Revocation of certificates

The revocation consists of the loss of reliability of the certificate and the permanent cessation of its operation, preventing its use by the subscriber; once the certificate has been revoked, the Certificate Authority includes it in the CRL in order to notify third parties that a certificate has been revoked at the time its verification is requested.

ANDES SCD publishes the CRL every 24 hours, the last CRL issued for each CA contains all the certificates issued by the respective CA that are revoked as of the date of generation of the CRL. The user is advised to check the date of the CRL to verify that it is the one recently issued.

The certificates that are revoked may not for any circumstance return to the active state, this being a definitive action.

The legal representative of the Legal Entity that appears as the subscriber of the certificate may request the revocation of a Legal Entity certificate, based on the means of revocation offered by Andes SCD in the section "means to revoke certificates" of the DPC and following the revocation procedure specified in the section "procedure to revoke certificates" of the DPC. Additionally, Andes SCD or any of the authorities that compose it may request the revocation of a Legal Entity certificate if it has knowledge or suspicion of the compromise of the subscriber's private key or any other determining fact that requires the revocation of the certificate.

The Statement of Certification Practices details the circumstances under which the revocation of a digital certificate is resorted to, the means available to carry out the

revocation, the procedure for revoking a certificate, the time it takes Andes SCD to process the revocation request and to publish the revoked certificates in the CRL.

Issued CRLs, including those that have been replaced by newer versions or that have expired, are stored and retained for a minimum period of seven (7) years, counted from the date of issuance.

4.7. Replacement of certificates

The replacement of a certificate is the procedure where a digital signature certificate is replaced at the request of the entity/subscriber that has acquired it for any of the following reasons:

- Loss or exposure of the certificate PIN
- Change of the information of the holder and/or entity of the certificate, as long as it belongs to the same NIT.

Andes SCD has established the following conditions for the replacement of a certificate:

- To make the replacement request, the certificate to be replaced must be valid.
- The certificate to be replaced must have an initial validity equal to or greater than 6 months
- The certificate to be replaced must have a remaining validity of more than 60 days.
- Communicate the reason for the cancellation of the certificate to be replaced.
- The replacement applies to request the same type of certificate initially acquired

The conditions of replacement may vary according to the specific agreements with users managed through a coordinator or through agreements.

4.8. Certificate Status Services

The Statement of Certification Practices provides information on the means of publishing the status of certificates issued, the availability of the service, and the end of subscription to the certification service.

	LEGAL ENTITY CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.9.13
		Effective Date:	16/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

4.9. Validity of certificates

The validity period of the digital certificates issued by ANDES SCD S.A. is explicitly defined in each certificate through the validity fields notBefore and notAfter, which are generated and coded in accordance with the ISO 9594 / X.509 and ISO 15782-1 standards.

For all types of certificates issued by ANDES SCD S.A., the maximum validity shall not exceed seven hundred and thirty (730) calendar days, counted from the date of issuance of the certificate.

The pair of keys has the same period of validity as the digital certificate that endorses them

5. Security Controls

The systems and equipment used by ANDES SCD to offer the certification service are physically located in a Data Center.

Designed to specifications with the strictest construction regulations and adherence to rigorous operating standards to ensure that the equipment and information housed there have the highest level of security and availability. In the event of an incident with its main Data Center, ANDES SCD has an alternate data center that has optimal security mechanisms to guarantee continuity in the provision of services.

The technological infrastructure that supports the certification services that are continuously monitored through a NOC/SOC to identify any type of alert or incident that may compromise the security or availability of the provision of services.

The other procedural, physical security and personal security controls are specified in the Andes SCD Certification Practices Statement

6. Technical security controls

6.1. Key generation and installation

6.1.1. Key Pair Generation

The public and private keys of holders of Legal Entity Certificates are generated in accordance with the processes stipulated in the DPC in the section "Generation of the pair of Keys". The method of generating the subscriber's key pair varies according

	LEGAL ENTITY CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.9.13
		Effective Date:	16/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

to the form of delivery of the certificate chosen by the subscriber or according to the agreement.

6.1.2. Delivery of the private key to the subscriber

When the private keys of legal entity certificates are generated by ANDES SCD, they may only be stored on cryptographic devices that comply with the FIPS 140-2 Level 3 standard.

When the delivery format is PKCS10 the key pair is generated by the subscriber himself, the private key is never known to ANDES SCD.

In the DPC in the "Identity Approval" session, the method for proving possession of the private key for each of the end-entity certificate issuance mechanisms is described:

6.1.3. Delivery of the public key to the certificate issuer

The mechanism for handing over the public key to holders of Legal Entity Certificates is described in the DPC in the section "handing over the public key to the issuer of the certificate".

6.1.4. Subscriber's Public Key Distribution

The public key of any subscriber of Legal Entity Certificates is permanently available for download in the Andes SCD certificate directory as long as the certificate is not revoked.

6.1.5. Distribution of the Andes SCD public key to users

The public key of the Andes root CA and the Class II or end-entity certificate-issuing CA is permanently available for download on the Andes SCD website.

When the SubCA public key is renewed, the Certificate Authority makes the prior notification to the interested parties in accordance with the provisions of this DPC and the communications matrix.

This notification is made through the defined institutional channels, sufficiently in advance to allow the updating of the certification chains, dependent certificates and associated configurations, guaranteeing the continuity of the CA's services and avoiding operational interruptions.

6.1.6. Period of use of the private key

	LEGAL ENTITY CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.9.13
		Effective Date:	16/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

The period of use of the private key is the same time as the validity of the Legal Entity certificate or less if the certificate is revoked before expiring.

The Andes SCD DPC details the period of use of the private key of the root CA and the Class II or Final Entity certificate-issuing CA.

6.1.7. Size of the keys

The size of the Legal Entity certificate keys is 2048 bits based on the RSA algorithm.

The size of the certified keys of the CA issuing the Legal Entity certificates has a length of 4096 bits based on the RSA algorithm.

6.2. Private Key Protection Checks

The Andes SCD Statement of Certification Practices specifies the controls and standards of the cryptographic modules, the control, backup, storage, activation, deactivation and destruction of the Certification Authority's private keys.

The following are the controls for protecting the subscriber's private key:

Protection Control	Subscriber-generated private key from Device TOKEN and CSR
<u>Private Key Backup</u>	Andes SCD does not perform backup, nor is any recovery mechanism implemented on the private keys of the subscribers generated from the TOKEN device or when the certificate is generated from CSR. Andes SCD is never in possession of such keys and they only remain in the custody of the subscriber himself
<u>Private Key Storage</u>	Subscribers' private keys generated from the TOKEN device are NEVER stored by Andes SCD. The same happens when the certificate is generated from CSR delivered by the subscriber. The private key must be stored by the subscriber himself through the retention of the TOKEN device or other methods, because they may be necessary to decrypt the historical information encrypted with the public key
<u>Private Key Transfer</u>	The subscribers' private key generated from the TOKEN never leaves the device. With the TOKEN device, the pair of keys is generated and its use is protected through a PIN that only the subscriber knows.

	LEGAL ENTITY CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.9.13
		Effective Date:	16/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

	The user-generated private key that CSR delivers for certificate generation is held by the subscriber and is never sent to Andes SCD.
<u>Private Key Activation</u>	The activation of the TOKEN device containing the subscriber's private key is done through a PIN that must be customized by the subscriber himself at the time of generating the pair of keys. The protection of activation data is the responsibility of the subscriber
<u>Deactivating the private key</u>	The method to disable the subscriber's private key is to remove the TOKEN device from the computer, immediately any associated content is disabled including the private key
<u>Private Key Destruction</u>	The destruction of the private key can be performed by the subscriber himself using the functions provided by the TOKEN device, taking care not to affect other private keys stored on the device. The destruction of the subscriber's private key can be performed by the subscriber himself by deleting the private key corresponding to the CSR sent to Andes SCD. Private keys of subscribers to the centralized signing service are generated and stored in a protected form within an HSM, using key wrapping mechanisms with a non-exportable AES key. The Certificate Authority does not access or process keys in clear text, and their use is strictly controlled through authentication, authorization, and validation of the certificate status. When a certificate expires or is revoked, the associated private key is permanently disabled for use, preventing any further cryptographic operations, even if the protected material remains stored. This scheme guarantees the impossibility of use and non-reuse of private keys, in compliance with WebTrust criteria.

		Approved:	General Manager

6.3. Supported Cryptographic Devices

Cryptographic devices supported by ANDES SCD must meet the following characteristics:

- Generates RSA key pairs up to 2048 bits.
- Algorithms for RSA, DES, 3DES, MD5 and SHA-256 generation implemented by hardware.
- Random number generator hardware.
- Digital signature generator hardware.
- Minimum available space of 64 Kb.
- FIPS 140-2 Level 3 Certification
- CE and FCC certified.
- Full support for PKI applications.
- Compatible with CAPI and PKCS#11 interfaces.
- Support for multi-key storage.
- Support for X.509 V3 standard certificate format.

6.3.1 Associated risks

6.3.1.1. Risks associated with certificates issued on cryptographic devices

Cryptographic devices supported by ANDES SCD may present risks such as:

- Loss of the device
- Key Compromise
- Damage from improper handling or environmental conditions.
- Damage from voltage variations.
- To mitigate the associated risks, some safety regulations must be taken into account:
- The PIN is confidential, personal and non-transferable.
- It is recommended to change the PIN periodically.
- Cryptographic devices should be kept in proper environmental conditions away from moisture.
- In case of compromise or loss of the private key, the revocation of the certificate must be requested.

	LEGAL ENTITY CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.9.13
		Effective Date:	16/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

6.3.1.2. Risks associated with certificates issued in software (PKSC10)

Risk	Description	Recommendation
Improper use of the certificate by the subscriber	In case of using the signature on a certificate of a different nature, it will lose its legal validity and the right to non-repudiation.	The use of the certificate must be exclusive to the nature and scope for which it is requested; which is specified on the certificate PC.
Improper custody of the private key of certificates issued from a PKCS10 request	Loss of certificate reliability (due to copying or impersonation risks)	Store in a secure location for exclusive subscriber access
Private Key Compromise	Access to the private key by malicious third parties	- Use of software recommended by ANDES SCD (CSR Generator Software and PFX Generator Software). - Store in a secure location for exclusive subscriber access. - Protect your key by using your password that only you have access to. - Use a secure Keystore for the custody of your private key.

Remember that once the certificate has been generated and delivered, the applicant will carry out the verification with the appropriate mechanisms to determine that it corresponds to the request made in the PKCS#10 format

6.4. Other aspects of key pair management

6.4.1 Public Key File

	LEGAL ENTITY CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.9.13
		Effective Date:	16/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

Andes SCD keeps all the digital certificates of Legal Entity on file, which include the public key during the period stipulated in the "Archiving the Public Key" section of the DPC.

6.4.2. Operational periods of the certificate and periods of use of the pair of keys

The life of the Legal Entity certificate is governed by its validity or as long as its revocation is not explicitly stated in a CRL or in the online verification system. If any of these events occur, the validity of the certificate is terminated and the certificate can only be used for historical verification purposes.

The pair of keys is valid as long as there is a valid Legal Entity certificate that supports them. Once the certificate is no longer valid, the keys lose all legal validity and their use is limited to exclusively personal purposes.

6.5. Activation data

6.5.1 Generation of activation and installation data

The subscriber must generate the activation data of their TOKEN by changing the initial PIN that the device comes with by default.

The PIN must be kept by the subscriber so that it is not known to anyone else and exclusive control of the TOKEN is guaranteed.

6.5.2 Protection of activation data

The PIN or activation data of the TOKEN must be personalized by the applicant before generating their pair of keys or if there is a suspicion that a third party knows this data.

To change the PIN, it is necessary to download the software application offered by the manufacturer of the TOKEN and which is available on the Andes SCD website

6.6. Computer security controls

The Statement of Certification Practices describes Andes SCD's controls to ensure adequate safeguarding of IT resources.

6.7. Cessation of ECD activities

The Statement of Certification Practices describes the procedures for notification and termination of the CA or RA

Identification algorithm	Algorithm used to obtain the fingerprint of the certificate	Sha1
Fingerprint	The synthesis or fingerprint of the certificate data	Fingerprint
Using the Key	Purposes for which the certificate should be used.	Digital Signature No repudiation Key encryption Data encryption

7.2. Certificate Profiles

7.2.1. Version number

Legal Entity certificates issued under this policy are in compliance with the X.509 V3 standard and in compliance with RFC 5280 for certificate profiles and CRLs.

7.2.2. Certificate Extensions

The Legal Entity certificates issued by Andes SCD use a series of extensions that aim to establish the uses of the certificate, reference the applicable Certification Policies and additional restrictions. The extensions included in the digital certificates of Legal Entity are detailed below.

Extensions Certificates Legal Entity according to X.509V3 standard	
Name	Value
Access to issuer information	Access Method=Online Certificate Status Protocol Dirección URL= http://ocsp.andesscd.com.co

	LEGAL ENTITY CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.9.13

Holder key identifier	Holder's key identifier
Issuer Key Identifier	Identifier of the Andes SCD CA Key That Issued the Certificate
CRL Distribution Points	CRL publication URL of the CA that issued the certificate.
Using the Key	Digital Signature No repudiation Key encryption Data encryption
Improved key usage	Client authentication Secure Email
Alternative name of the holder	Email del suscriptor RFC 822 Name (e-mail address)
Basic Restrictions	Subject Type=End Entity Path Length Constraint=None
Certificate policy	[1]Certificate policy: Policy ID=1.3.6.1.4.1.31304.1.2.9.13 [1,1]Policy certifier information: Policy Certifier ID=User Notice Certifier: Notice Text=The use of this certificate is subject to the Legal Entity (PC) Certificate and Certification Practices (DPC) Policies established by Andes SCD. [1,2]Policy certifier information: Policy certifier ID=CPS Certifier: Current DPC URL

7.2.3. Algorithm object identifiers

Legal Entity digital certificates issued under this policy use the following algorithms and their corresponding identifiers (OIDs)

- SHA256withRSAEncryption Signature Algorithm OID 1.2.840.113549.1.1.11
- RSAEncryption Public Key Algorithm OID 1.2.840.113549.1.1.1

	LEGAL ENTITY CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.9.13

		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

7.2.4. Name formats

The Digital Certificates of Legal Entity issued by Andes SCD are restricted to 'Distinguished names' (DN) X.500 which are unique and unambiguous, the certificates contain the DN of the issuer and subscriber of the certificate in the issuer name and subject name fields respectively.

7.2.5. Name restrictions

Digital certificates issued under this policy have DN's in accordance with X.500 recommendations that are unique and unambiguous.

7.2.6. Certification Policy Identifier Object

Certification policies and practices are identified by a unique number called OID, the OID assigned to this policy is 1.3.6.1.4.1.31304.1.2.9.13

More information on this topic can be found in the Statement of Certification Practices in the section in the identification object section of the certification policy

7.2.7. Syntax and semantics of policy qualifiers

The extension of the certificates referring to the ratifiers of the Certification Policy contains the following information:

- **Policy identifier:** Contains the identifier of the Legal Entity Certificate Policy
- **CPS:** Indicates the URL where the Statement of Certification Practices (CPD) is published to be consulted by users
- **User Notice:** contains the text "The use of this certificate is subject to the Legal Entity PC and the DPC established by Andes SCD". Accreditation code: 16-ECD-004.

7.3. CRL Profile

7.3.1. Version number

The CRLs issued by Andes SCD correspond to the X.509 version 2 standard

7.3.2. CRLs and extensions

The CRL revocation list is issued as stipulated in RFC 5280

CRL profile according to X.509V2 standard – CRL

Issue distribution points	URL where the CRLs issued by Andes SCD are published	View the CRL for the publication URL
Revoked certificates	List of revoked certificates specifying the serial number, date of revocation and reason for revocation	

7.4. OCSP Profile

OCSP Service and Response Certificate Profile

The Certificate Authority (CA) operates an Online Certificate Status Protocol (OCSP) service, in accordance with the provisions of RFC 6960, in order to provide timely and reliable information on the status of issued digital certificates.

The OCSP service is used by trusted third parties, applications, and systems that require verification of the revocation status of certificates issued by the CA.

OCSP responses are digitally signed by the CA or by an authorized OCSP Responder, using an OCSP response certificate whose profile, extensions, and restrictions are defined in this paragraph.

The consumption of the OCSP service is done through the access points published by the CA, using OCSP requests that conform to the applicable standards. The service

	LEGAL ENTITY CERTIFICATION POLICY	OID Identifier:	1.3.6.1.4.1.31304.1.2.9.13
		Effective Date:	16/02/2026
		Version:	13
		Classification of information:	Public
		Elaborated:	Chief Operating Officer
		Reviewed:	Policy and Security Committee
		Approved:	General Manager

responds, at a minimum, with the states good, revoked, or unknown, according to the information available in the CA revocation repositories.

OCSP responses include the `thisUpdate` and `nextUpdate` temporal fields, which determine the validity period of the response and allow trusted third parties to evaluate its validity.

The CA implements technical and operational controls to guarantee the availability, integrity and authenticity of the OCSP service, as well as mechanisms for monitoring and recording events associated with its operation.

Note: The following example is illustrative and does not limit the use of other OCSP-compliant tools.

```
openssl ocsp -issuer ca_emisora.pem -cert certificado_consultar.pem -url
http://ocsp.andesscd.com.co -CAfile ca_emisora.pem -resp_text -noverify
```

Example overview:

- issuer: Certificate of the CA issuing the certificate queried.
- cert: Certificate whose status is to be verified.
- url: Access point of the OCSP service published by the CA.
- CAfile: CA certificate for response validation (if applicable).
- resp_text: Displays the readable contents of the OCSP response.

The OCSP response will allow you to determine the status of the certificate consulted (good, revoked or unknown) and evaluate the validity of the information using the temporary fields included in the response.

7.4.1. Version Number

The OCSP certificate is issued in accordance with the X.509 V3 standard

7.4.2. OCSP Extensions

OCSP extensions according to X.509V3 standard	
Name	Value

9.4. Intellectual Property Rights

As stipulated in the Andes SCD Statement of Certification Practices

9.5. Rights and Duties

The Statement of Certification Practices lists the obligations and guarantees of the Andes SCD Certification Authority, the Registration Authorities, the applicants, subscribers and users of the certification service

9.5.1 Rights and Duties of ANDES SCD.

The Statement of Certification Practices lists the obligations and guarantees of the Andes SCD Certification Authority

9.5.2. Rights and Duties of the Applicant

The Statement of Certification Practices lists the rights and duties of applicants

9.5.3. Rights and Duties of the Subscriber

The Statement of Certification Practices lists the rights and duties of subscribers

9.5.4. Prohibitions for the subscriber:

The subscriber, in the consumption of ANDES certification services, must refrain from:

1. Alter or modify, in whole or in part, the digital certificate or the software delivered by ANDES SCD, or allow third parties to do so.
2. Copy or reproduce in any form the digital certificate, or allow its copying or reproduction.
3. Perform reverse engineering, decoding, disassembly or perform any type of action aimed at knowing or deciphering the source code, object code or other relevant information regarding the digital certificate or software that is related to the provision of the ANDES SCD service.
4. Transfer, assign or negotiate the rights granted under the services of ANDES.
5. Allow third parties to benefit from or use, directly or indirectly, the rights that derive from the provision of digital certification services, under the conditions of this document.
6. Give the digital certificate a use other than that which is derived from the Statement of Certification Practices.
